Resource persons: Mr.M. Apparao (AE),I&CAD Department

Name of the coordinators. AARADHNA RAO, Assistant professor, Department of CIVIL Engineering

Total Number of participants: 97

Objective of the event:

1. To study occurrence movement and distribution of water that is a prime resource for Development of a civilization..
2. To know diverse methods of collecting the hydrological information, which is essential, to understand surface and ground water hydrology.
3. To know the basic principles and movement of ground water and properties of ground Water flow.

Outcome of the Event:

1. Provide a background in the theory of hydrological processes and their measurement
2. Apply science and engineering fundamentals to solve current problems and to anticipate, mitigate and prevent future problems in the area of water resources management
3. An ability to manipulate hydrological data and undertake widely-used data analysis.
4. A systematic understanding of the nature of hydrological stores and fluxes and a critical awareness of the methods used to measure, analyze and forecast their variability; and the appropriate contexts for their application.
5. Can define the key components of a functioning groundwater, can determine the main aquifer properties – permeability, transmissivity and storage Identify geological formations capable of storing and transporting groundwater.
